

# EXTREME SCIENCE

(picture of the animal, plant, or object. A drawing or photo from the internet is fine)

## **Largest Dinosaur**

(Anything that occurs in nature with a measurable quality that makes it “extreme”, such as largest, fastest, oldest, most teeth, lightest bones, most poisonous. Animals, plants, planets, rivers, etc are fine )

Briefly describe the subject with a report on its size, age, or whatever quality makes it extreme, where it is located, when it lived, and any interesting fact related to its extreme property.
